1 Read about children who don't go to school and answer the questions.

Are there some days when you don't want to go to school? Many children around the world don't go to school. But they don't stay at home either. These children have to work.

Some children work in the fields or on farms. They help grow food for their families to eat. Some children work in the cities selling candy or cleaning shoes to get money for their families. Some children make shoes or clothes in factories. And some children walk down the streets asking people for money.

Life is hard for these children. They work because they are very poor. Sometimes they don't have food. Sometimes, they don't have a bed to sleep in. These children don't have toys to play with, and they don't have time to play. If they go to school, they can't earn money and if they don't earn money, they can't buy food to eat.

So next time you don't want to go to school, think of the millions of children who can't go to school.

1 What kinds of work do poor children do? Find examples in the text.

- a They grow food in the fields. b _____
c _____ d _____

2 Find four things in the text that money can buy for us.
